THE DESIGN COMPETITION 2019 - 2020

GUIDANCE NOTES FOR ENTRANTS AND TUTORS

GENERAL

- * All entries into the Design Competition must include a clearly marked Main Sample. The entry will be judged on the Main Sample so please take time to consider which sample you designate as your main one to give your work best chance of an award.
- * Basic technical/making details should be included for the Main Sample only. These details must be attached (securely, please) to the front of a board or under the sample (as long as the sample can be lifted easily to reveal the information required).
- * Comprehensive Guidelines for the content of technical information are given on Page 22 and include such details as:- yarn compositions, base fabrics, type of printing, machines used etc, all as appropriate for the particular section entered. It is, however, appreciated that not all information may be available to you. Any information which is given will be treated in the strictest confidence by everyone involved in the organisation and judging of the competition.
- * Please take time to consider whether you have entered your work into the most appropriate section of the Design Competition and that you have fulfilled the requirements of the section brief. Your work will then have the best possible chance of being selected for an award.
- * All work should be mounted in such a way that it will withstand being displayed in exhibition conditions if it is selected for an award. Masking tape does not hold textile pieces and double-sided tape is not always reliable, the heat generated from exhibition lighting can have adverse effects on the glue of double-sided tape causing the work to fall off which could be detrimental to it. Please try to stitch or use wire to secure textile work.
- * Please think carefully about the safety of others before including in your entry anything which could be harmful to those who have to handle the boards. In recent years we have had entries with items of cutlery, double-pointed knitting needles and pieces of sharp metal and plastics. By all means include what you like but please ensure it is safe by taping sharp points and edges. Thank you.

GUIDANCE NOTES FOR ENTRANTS AND TUTORS - continued
